

RESOLVED: That the State Library conduct demonstration projects (i.e., long-term feasibility studies or cost-benefit analyses) that will exemplify the advantages brought by technological advances in the library field to the State of North Carolina. Such projects to include but not limited to: a prototype automated library center; on-line information retrieval; uses of public television; and, uses of cable television.

*Issue #3*

Governor's Conference Evaluation

RESOLVED: That an evaluation of progress in library and information services resulting from the Governor's Conference will be necessary, and that the Governor be encouraged to convene such a conference within five years.
